This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

OF

WORKS ON ENGINEERING

AND

ALLIED SUBJECTS

IN THE

REYNOLDS LIBRARY

Compiled by Anne Rose Collins

PRICE, ONE DOLLAR

ROCHESTER, N. Y.
1902

ROCHESTER ENGINEERING SOCIETY.

In response to a long existent sentiment among the Engineers of the City of Rochester, that their professional interests would be advanced and their social intercourse with one another be promoted thereby, an association was formed January 21, 1895, under the auspices and patronage of the Rochester Academy of Science.

This association was continued under the name of "The Section of Engineering of the Rochester Academy of Science," until March 18, 1897, when it was dissolved by the unanimous vote of its members and a new and independent organization was formed under the name of the ROCHESTER ENGINEERING SOCIETY.

The Trustees of the Reynolds Library, in furtherance of the beneficent purposes of its founder, tendered the Society the free use of the Library Lecture Room for holding its meetings and conducting its business, and also granted the use of a small reading room in the Library building to the Society, where the engineering books and periodicals are shelved, and where the members of the Society are at liberty to meet at all times for purposes of conversation, discussion or reading. The Trustees of the Library further manifested their interest in the purposes of the Society and their desire to advance its usefulness, by offering to purchase such engineering books and periodicals as the Society might select, provided the Society pay one-half the purchase price thereof, and that the books thus purchased become the property of the Library. Under this arrangement a start has been made in the formation of a Library of Engineering Literature that bids fair to become very valuable, as most of the money yearly collected from the Society is devoted to this purpose.

The Society hereby testifies its grateful appreciation of the favors received from the Trustees of the Reynolds Library.

EXPLANATIONS.

The form adopted is that of the Dictionary catalogue, indexing both subjects and authors. Names of AUTHORS appear in small capitals; **subjects,** in heavy-faced type.

An asterisk (*) placed opposite the title denotes that the book was purchased at the instance of the ROCHESTER ENGINEERING SOCIETY, under the arrangement previously mentioned.

Abbreviations: n.d., no date; n.t.p., no title page.

A catalogue of the personal library of J. Nelson Tubbs, C. E., is appended. These books have been loaned by Mr. Tubbs to the Society, and have been shelved with the Engineers' books.

CATALOGUE

ABBOT, H. L. Report on the physics and hydraulics of the Mississippi River. *See* Humphreys, A. A., *and* Abbot, H. L.

*ABBOTT, A. V. Electrical transmission of energy. N. Y. 1895.

ABERNETHY, J. P. Modern service of commercial and railway telegraphy. Cleveland. 1891.

ABNEY, W. de W. Treatise on photography. Lond. 1893.

Accidents. *See* **Factory accidents.**

Acoustics.

AIRY, G. B. On sound and atmospheric vibrations. Lond. 1871.

BLASERNA, P. Theory of sound in its relation to music. N. Y. 1876.

DONKIN, W. F. Acoustics. Oxford. 1870.

HELMHOLTZ, H. L. F. On the sensations of tone; tr. by A. J. Ellis. Lond. 1895.

TYNDALL, J. Sound. N. Y. 1867.

*ADAMS, B. B. Block system of signaling on American railroads. N. Y. 1901.

Adirondack Survey, N. Y.

COLVIN, V. Report on the Adirondack and State Land Surveys; 1873-79, 1884, 1886, 1896. Albany. 6 v.

Air, Compressed. *See* **Compressed air.**

Air engines.

*DONKIN, B. Text book on gas, oil and air engines. Lond. 1896.

AIRY, G. B. On sound and atmospheric vibrations. Lond. 1871.

*AITKEN, T. Road making and maintenance. Lond. 1900.

*ALDEN, C. A. Street railway roadbed. *See* Pratt, M. D., *and* Alden, C. A.

Algae.

RAFTER, G. W. On the fresh water algae and their relation to the purity of public water supplies. n.t.p.

*ALLEN, C. F. Railroad curves and earth work. N. Y. 1899.

ALLEN, Z. Philosophy of the mechanics of nature and of natural motive power. N. Y. 1852.
